Nikolay Zhuravlev

Russia, Ekaterinburg

Email: znick.znick.znick@gmail.com

phone: +7-922-20-20-500 skype: nickolai_zhuravlev

Skills

- Operating systems: Linux, Windows
- Languages: C++, Python, Perl, JavaScript, Java, SQL, PHP, HTML, CSS
- Data processing: MapReduce, Hadoop

Python, Objective-C for iOS, Testing Suricata

- Databases: MySQL, PostgreSQL, MongoDB
- **Networks:** TCP/IP, ISO OSI, switching, routing, application level protocols
- Maintenance different UNIX software: Linux OS (Debian, Ubuntu), nginx, docker, bind, openvpn, apache, exim, squid, openvz.
- Other: git, agile development, software architecture, design patterns.

Languages

- Russian (native)
- English (intermediate)

Experience

Market Search Infrastructure Team Lead — Yandex.Market Leading infrastructure team:)	Jan 2021 – present
Search backend developer — Yandex.Market	Jan 2015 – Dec 2020
Different features of Yandex.Market search runtime backend	
Optimization and refinement of the infrastructure and the search engine Yandex.Market	
C++, Python, MapReduce, svn, git	
Software engineer — Yandex Search, Data preparation team	Sep 2012 – Jan 2015
Make large amount of unstructured data be ready for search indexer.	
Aggregating data from social networks, extracting from them a useful signal for searching.	
C++, Python, MapReduce, svn, git	
Teaching assistant — Department of Math and Mechanics ,	Oct 2006 – Jul 2017
Ural Federal University	
Teaching courses: Operating systems, Networks, Script Languages (Python, Perl), Software Engineering, Practical security	
Software engineer — RYDLAB	Jun 2011 – Aug 2012
Objective-C for iOS. Backend for comfortable using WebSockets and other backend	
Testing Suricata to satisfy our requirements (first of all performance testing, but not only). A couple of small projects with Python and Django.	

Software engineer — **Ideco Software**

Jul 2010 - Jun 2011

Developed Data Leak Prevention (DLP) module from scratch, which can scan HTTP and SMTP traffic for restricted documents and block their transmission.

Python, C, MySQL, Firebird DB, PHP, Squid, Postfix.

IT system administrator — Ural State Academy of Architecture and

Sept 2005 - Oct 2006

Arts, IT department

UNIX and Windows maintenance: Apache, Apache Tomcat, qmail, bind, AD

IT system administrator — Russian academy of science, Ural branch,

Sept 2003 - Sept 2005

Institute of solid state chemistry

Other activities

Security enthusiast

Member of HackerDom team. Got prizes from many CTF contests (iCTF 2007 (3 place), iCTF 2008 (4 place), CIPHER 2009 (2 place)

CTF contest developer

HackerDom has it own CTFs – RuCTF and RuCTFE. From 2005 I have been devteam leader and chief newtork administrator for many times (not all of RuCTFs, but the most of them). During this period RuCTF(E) has grown from small regional CTF to big CTF with 79 teams from all over the country (RuCTF 2012) and international CTF with 99 teams (RuCTFE 2011) from all over the world.

Education

Master of Mathematics & Computer science — Institute of Mathematics and Computer Science, Ural Federal University

2008 - 2009

Thesis title: The language for description and automatic network configuration

Bachelor of Mathematics & Computer science — Institute of Mathematics and Computer Science, Ural Federal University

2003 - 2007

Thesis title: Regular expressions computational complexity

Professional interests

- Compilers & programming languages
- System programming
- Architecture
- Networks
